DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-4, 7-10, 11, 14-16, 17, 20-25, drawn to a reconfigurable speaker system for generating audio sound for stereo signals, classified in class 381, subclass 1.

II. Claims 5-6, 12-13, 18-19, drawn to a reconfigurable speaker for generating stereo sound using dual voice coil audio speaker, classified in class 381, subclass 401.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the speaker

system of Group I can be utilized for general audio signals reproduction. The subcombination has separate utility such as utilizing dual voice coil speaker system of Group II as a digital speaker reproduction system.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
